

MMR

ARE YOU PROTECTED?

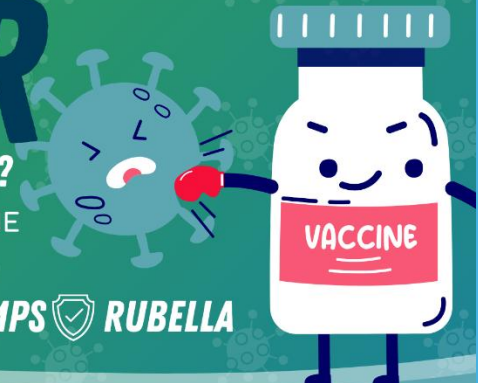

DOUBLE DOSE VACCINE

TRIPLE PROTECTION

 **MEASLES**
 **MUMPS**
 **RUBELLA**

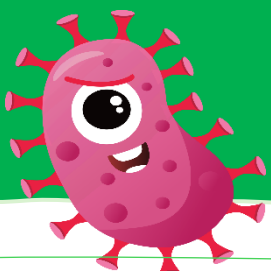

WHAT IS IT?

These are very infectious viral illnesses that are spread by coughs and sneezes. If you are not protected and have even passing contact with someone who has measles, mumps or rubella, the chances are that you will be infected too.

WHAT ARE THE SYMPTOMS?

<u>MEASLES:</u>	<u>MUMPS:</u>	<u>RUBELLA:</u>
- Fever - Sore, red eyes - Rashes	- Headaches - Fever - Painful swelling of the face glands. 'Hamster face' - Difficulty swallowing	- Rashes - Cold like symptoms - Aching of the joints

DOES IT WORK?

Over 99% of those who have 2 doses of the vaccine will be protected against measles and rubella. Although mumps protection is slightly lower, cases in vaccinated people are much less severe.

It's important to make sure that you are protected by having 2 doses of MMR vaccine!

SCAN ME FOR
MORE
INFORMATION!

We will always come in to your child's primary school to vaccinate for against MMR if we notice their records show they haven't had this between January - July. A consent form will be sent to you if you would like them to receive this.
